

. . . helping shape the industry

Dear CSMA member

Your association is working hard to ensure unified standards and building code changes that make permit applications easier to administer. Our goal is fair and reasonable practices that meet the building codes while providing building officials, homeowners, manufacturers and dealers the tools they need to make the permit review process as smooth as possible.

We are currently working hard to bring revisions to the next issue of the Ontario Building Code (OBC) that will benefit all concerned parties. Your association will soon be submitting a document with recommended code changes to the OBC. Our goal is to have a positive outcome in time for the next version of the OBC.

If you have any questions or would like to comment, please contact us at info@canadiansunroom.org.

A handwritten signature in black ink, appearing to read 'Perry Ruehlen', is located below the contact information.
